

12" Greasy Plate

D'Angelo's patented 12" Greasy Plate assembly is the only fifth wheel assembly of its kind which has owned the Australian market for over 50 years - and it is still selling strongly!

The 12" Greasy Plate assembly has many advantages over the other stabilised assemblies (such as ballraces), primarily it can achieve ride heights up to 50mm lower.

The 12" Greasy Plate has three overall heights available: 230mm Standard, 205mm Inverted and 180mm Super-Low Profile.

The 12" 'Greasy' also has patented safety blocks to help with rollover situations, and which are exclusive to D'Angelo.

Standard - 230mm	} Overall assembly height
Inverted - 205mm	
SuperLow - 180mm	

Mounting Assemblies

Applications

Stock Crate	General Freight
Semi-Tipper	Mining
Tanker	Roadtrain
Slide-back Trailers	Logging
Low Loader	

Specifications

Complies with AS 1773-1990.	Technical Data:
ADR 62/01	D-Value: 165kN
	Weight: 244kg

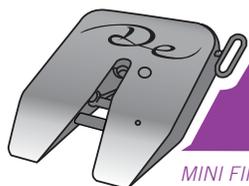

At a glance

- Up to 50mm lower than a ballrace assembly
- 3 available heights
- Patented safety blocks for better stability
- Tough and reliable (D-Value of 165kN)
- Perfect for stock-crate applications
- 50 years leading the field and still going strong

Designed and manufactured in Australia
